Scoring: Calculate the first 5 runners for each team in order of finish. The place equals the point value they contribute to the score (if you finish 3rd you receive 3 points). The total of the five places is calculated against each team – The team with the lowest score wins. In case of a tie, you go to the 6th and 7th team racer – if they finish ahead of an opposing team's first five runners this raises the score of the opposing team... strong front runners help win a team, but Championships are won with solid "team" runners who can stay in contact with the team.
